## Recommencement of Scour Protection Works at Gwynt y Mor

**Duration: 20<sup>th</sup> March – Mid April 2012**

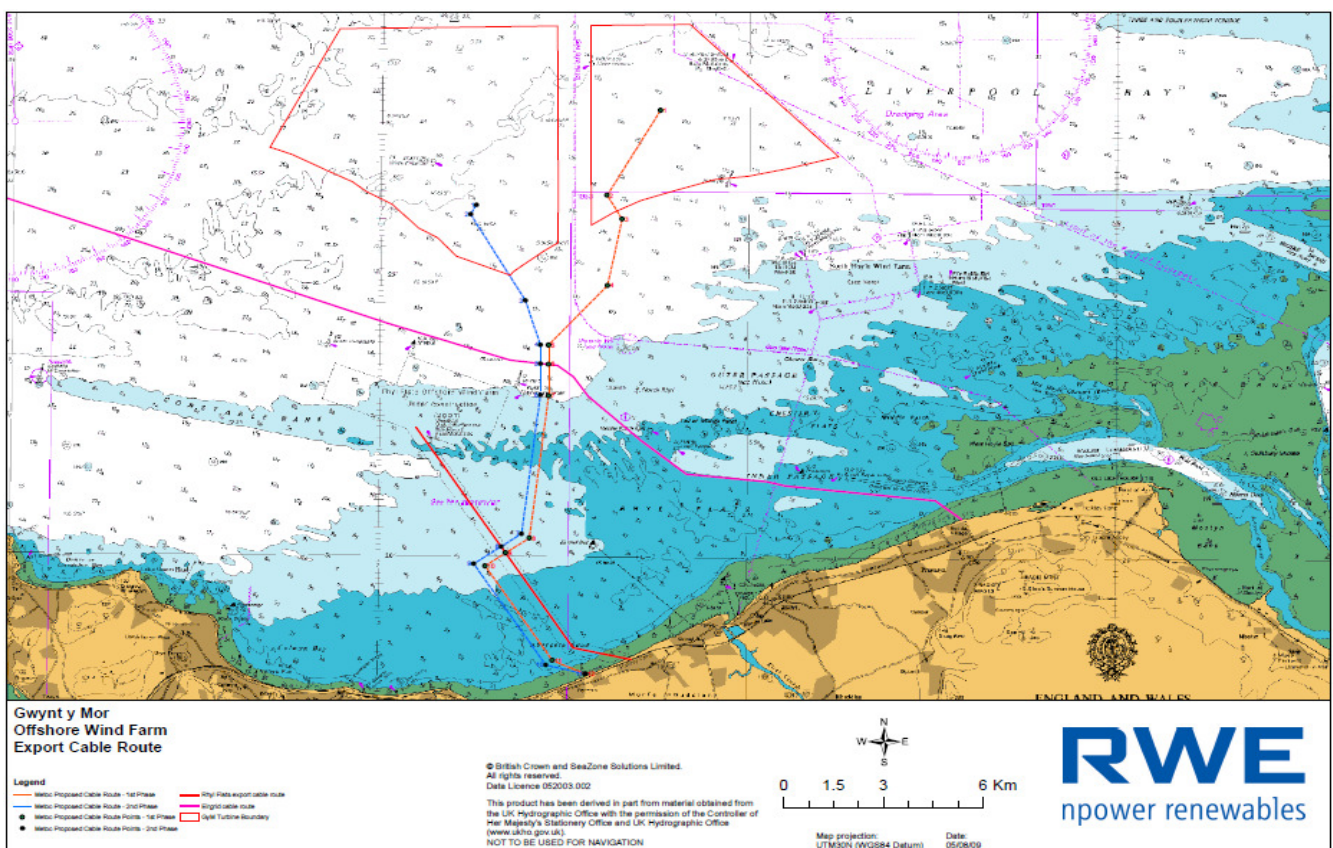

Please be advised that Scour Protection Works which were scheduled to commence on the 16<sup>th</sup> March 2012, actually commenced on 20<sup>th</sup> March 2012. The works were expected to take approx 16 days; however, the works will now last until Mid April 2012. This is due to a significant increase in the areas where scour protection is to be carried out during this campaign.

The works will be carried out by the “DP Fall Pipe Vessel – Tideway Rollingstone”.

The vessel will be operating at various locations within the Gwynt y Mor Offshore Wind Farm placing filter layer stones in the respective locations.

The vessel will be operated under Dynamic Positioning and all other traffic is advised to keep at least 500m clear of Tideway Rollingstone.

VHF 16 will be monitored at all times by Tideway Rollingstone.
