

Gwynt y Mor Offshore Wind Farm Navigation Warning Exposed Monopiles

Date of Notice:

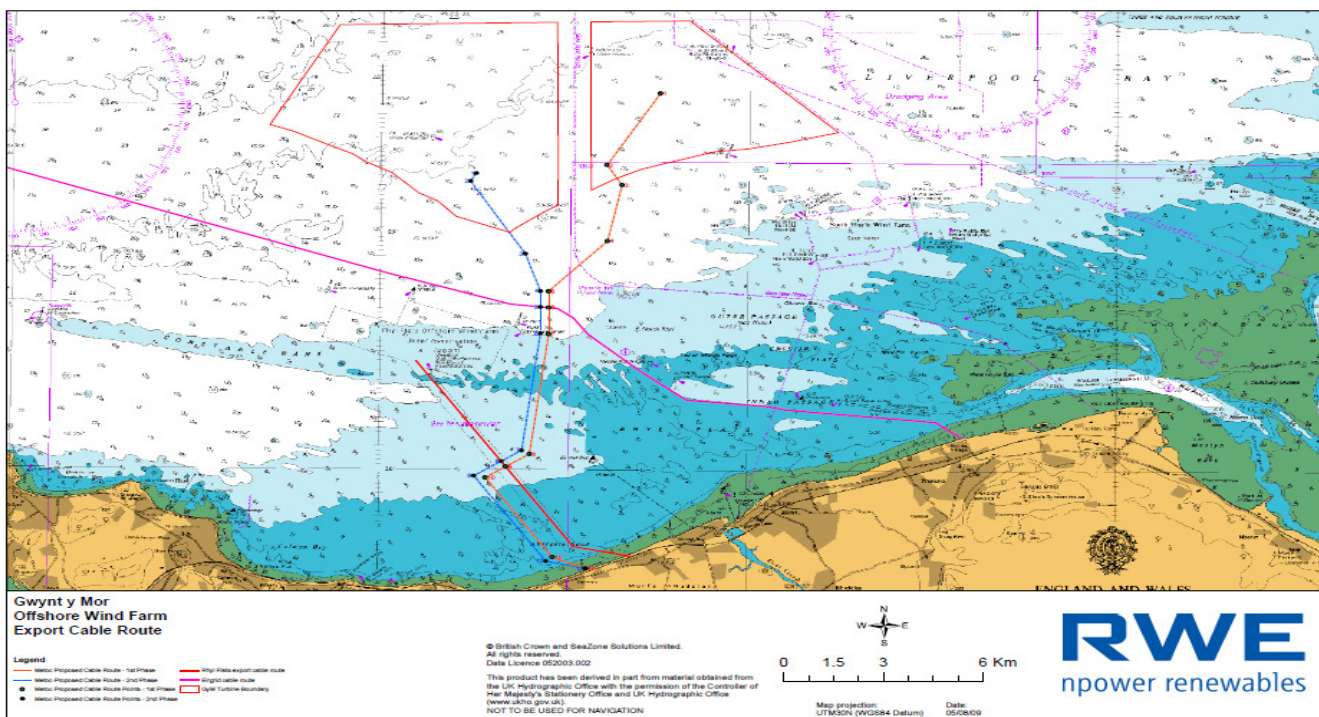

6th September 2012

To request further information please contact duty MC at: gym.mcc@rwe.com or +44 (0)7827244495

Notice no:

GYMNAV-001

Admiralty Chart Layout of Gwynt y Mor including Export Cable Routes

Please be advised that there are exposed monopiles at the Gwynt y Mor Offshore Wind Farm. These are hazardous to all vessels wishing to navigate within the field demarcation area. Each monopile is submerged on a high tidal cycle, therefore the only part of the hazard that is visible is the navigation aid placed on the top of each one. There is a yellow flashing light on each exposed monopile.

All vessels are to navigate with extreme caution within the field demarcation. Extra caution should be taken when in the vicinity of the HLV Stanislav Yudin as there may be occasions where the HLV Stanislav Yudin has not yet installed the navigation aid due to numerous factors.

Any vessel wishing to approach the Stanislav Yudin should not do so until permission has been granted from the vessel bridge, and all hazards are received and understood.
