Project Description

The Western HVDC Link Project consists of a 600 kV DC submarine system in the Irish Sea between Ardnail (Scotland) and Wirral (England) for a total route length of about 385 km. The cable route is shown in Figure 1 overleaf.

Survey task

A detailed geophysical survey will be carried out on a corridor of approx. $\pm 20\text{m}$ centred on a selected part of the cable route (from KP 376 to KP 345, nearshore section in Liverpool Bay of the Western HVDC Link cable route) by means of Gradiometer and SSS (Geophysical Spread) operated from surface. An option to carry-out a visual inspection of gradiometer targets with camera shall be considered.
