1. Introduction

The Awel y Môr Offshore Wind Farm is an extension of the Gwynt y Môr Offshore Wind Farm originally developed by RWE in the Irish Sea. The proposed site has a total area of 106km² with a capacity of approximately 576 MW. The development will include offshore transmission assets, with the export cable route likely to reach landfall on the North Wales coast to allow a grid connection at Bodelwyddan in Denbighshire.

Fugro will undertake a geotechnical site investigation to characterise the Awel y Môr Offshore Wind Farm extension areas.

Figure 1 is a map of the project location and includes the project boundaries.

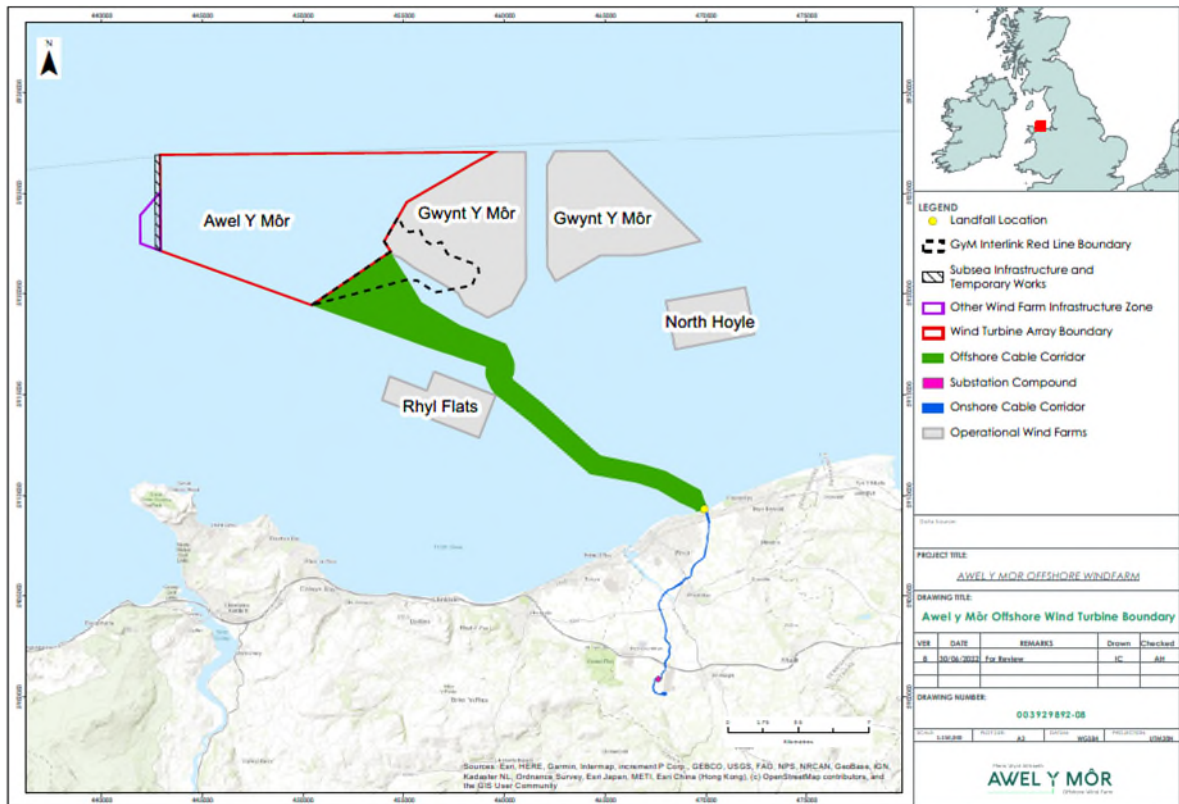

Figure 1: Project Location Map

This Notice to Mariners is an initial notification of Fugro’s intended schedule and utilisation of vessels to perform the abovementioned scope. It should be noted the actual schedule and project execution can be subject to change.

2. Area of Operations

The coordinates of the survey area are provided in Table 2.1 below.

Table 2.1: Survey Area Coordinates

Label	WGS84 Coordinates UTM zone 30N		WGS84 Coordinates Degrees Minutes Seconds	
	Easting (m)	Northing (m)	Lat (N)	Lon (E)
AWEL- BH01	446011.00	5924771.00	53° 28' 8.9868	-3° 48' 47.9988
AWEL- BH02	446977.00	5921153.00	53° 26' 12.2748	-3° 47' 53.4192
AWEL- BH03	450795.00	5925174.00	53° 28' 23.7144	-3° 44' 28.7988
AWEL- BH04	452814.73	5921376.00	53° 26' 21.4872	-3° 42' 37.2096
AWEL- BH05	443911.00	5923191.00 </td <td>53° 27' 17.0748</td> <td>-3° 50' 40.8588</td>	53° 27' 17.0748	-3° 50' 40.8588

Figure 2 is a map of the proposed borehole locations.

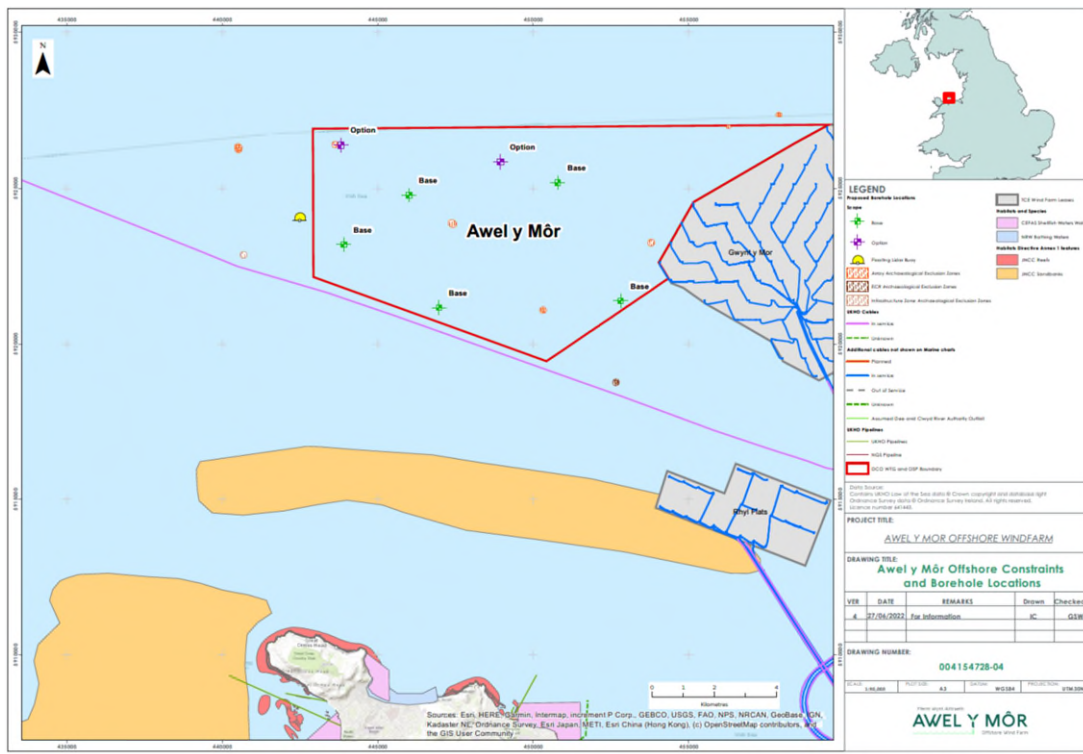

Figure 2: Proposed Borehole Locations

3. Geotechnical Site Investigation

The geotechnical investigation is expected to be carried out from the geotechnical DP2 drilling vessel Gargano starting around 1st August. Please note that the mobilization and demobilization dates will be dependent on the prevailing weather conditions and work progress. The vessel will be deployed for a period of between 3 to 5 weeks.

Operations will be conducted on a 24-hour basis. The vessel will be having regular port calls for crew change and bunkering purposes. Typically, a 4-week rotation schedule is maintained.

As the Gargano will be conducting drilling operations using a dynamic positioning system, it is requested that all vessels operating within this area keep their distance, maintaining at least the 500 m exclusion zone, and pass at minimum speed to reduce vessel wash.

4. Immediate Contacts

The contents of this notice are based upon our current site investigation programme and upon Fugro's planning at the time of submission. It should be noted that Fugro will endeavour to update this notice as required.

Enquiries regarding the contents of this Notice to Mariners, or any other matters, should be directed to Fugro (survey contractor).

For any fisheries related matters, please contact the projects Fisheries Liaison Officer, using the contact details provided below.

Nathalie Mallarino – Project Manager

Tel: +31 6 18912700 (mob), **Email:** n.mallarino@fugro.com

For enquiries related to Fishing, please contact the dedicated Fisheries Liaison Officer for the Awel y Môr Offshore Wind Farm:

Jim Andrews – Fisheries Liaison Officer (FLO)

Tel: +07908-225865, **Email:** jim@awjmarine.co.uk

5. Survey Vessels

The geotechnical operations will be conducted by the geotechnical drilling vessel Gargano. Client, contractor, and fisheries liaison contact details are provided in the Notice to Mariners distribution list in Section 6.
