

NOTICE TO MARINERS

Gwynt Y Mor Export Cable replacement operations

Please be advised of this notice advising mariners of the works for the replacement of a cable for Gwynt Y Mor export cable project. The work will start end of July and are scheduled including the second half of August, subject to weather.

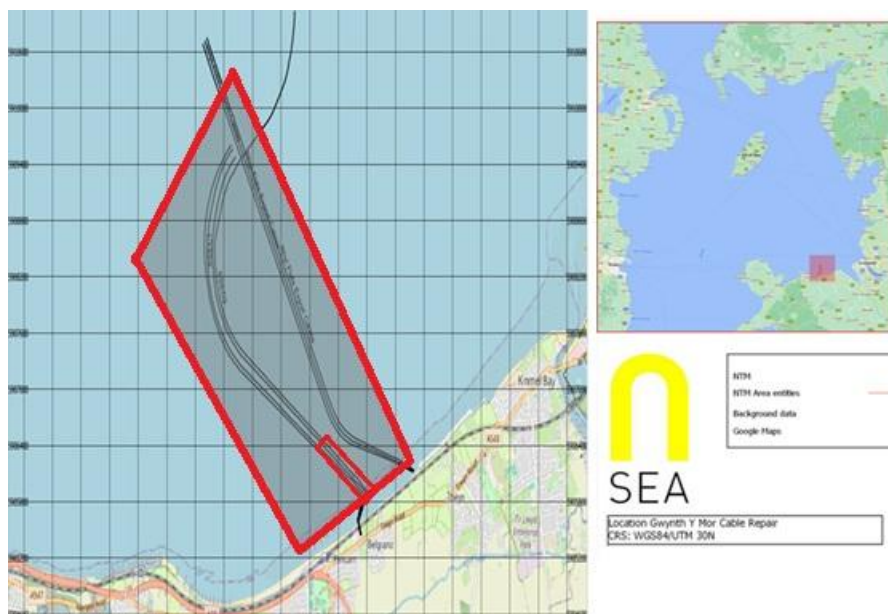

Figure 1 – Gwynt Y Mor Project Area

Nature of Operations

The works will include the replacement of a cable within the Gwynt Y Mor export cable corridor.

The works will be performed by Cable repair Vessel Curo and 2 assisting vessels, Mena C and Sandy M. The CRV Curo will be mostly moving on an anchor spread with floating anchor wires, meanwhile the Green Isle will prepare the cable for CRV Curo and remove the existing cable. The Gladiator will be functioning as a CTV for the required transfers. During the shore landing the Georgie Boy and open ribs will support the CRV Curo with operations in the intertidal area.

The operations for CRV Curo and assisting vessels is planned to be 24hrs operation. The Green Isle will work 12hrs operations and will stay in vicinity of the project location.

We kindly ask that all vessels in the local vicinity observe a 1000m stand-off at all times as the vessels may be limited manoeuvrable due to works on the cable and on an extended anchor spread.

During operations, the vessels will display the prescribed lights and signals for operations and will be monitoring VHF Channels 16 and 12.

Vessels during operations

CURO (Cable repair vessel)

VESSEL DETAILS		
Mobile	0031621 903 860	
Email	Curo-master@neptunemarine.com	
Call Sign	PCSA	
MMSI	244193000	
IMO	1042304	

CRC Gladiator (CTV vessel)
